

# Red Multi-Spoke Aluminum Alloy Wheel

This high-performance aluminum alloy wheel is designed for automotive applications. It features a vibrant red finish and a complex spoke design for enhanced strength and aesthetics.

## ADDITIONAL IMAGES

## Overview

### High-Performance Rally Wheel

The 10536 model is a high-performance aluminum alloy wheel specifically engineered for professional rally applications. Featuring a vibrant red finish and a complex multi-spoke design, it combines striking aesthetics with the robust construction required for demanding driving conditions. This wheel features a true beadlock (back lock) design, ensuring maximum tire security during intense off-road or performance maneuvers.

## Technical Specifications

### Wheel Dimensions

**17 inch**

Diameter

**9 inch**

Width

Model Number

10536

## Construction & Design

### Design Features

- Multi-spoke design for enhanced strength
- True beadlock (back lock) system
- Precision engineering for optimal balance
- Recessed triangular sections
- Multiple mounting points

Material

Aluminum Alloy

## Performance

### Primary Application

Professional Rally • Off-Road • Performance Racing

### Key Benefits

- Improved handling
- Smooth ride quality
- Durable finish to withstand harsh conditions
- High-strength construction

## Aesthetics

### Finish

Vibrant Red

### Hub Appearance

Black central hub with multiple bolt holes
