

Red Steel Children's Tricycle with Detachable Handle

This children's tricycle features a durable steel frame and a low center of gravity for stability. It is equipped with a detachable parent handle for assisted steering, a padded seat, and rubber grips.

Product Overview

Designed for Safety and Durability

This children's tricycle features a robust steel frame designed with a low center of gravity to ensure maximum stability during use. It includes a padded seat and rubber-grip handlebars for comfort, along with durable tires suitable for various surfaces. The inclusion of a detachable parent handle allows for assisted steering, making it an ideal choice for early riding stages and safety-conscious parents.
