

Red Translucent Electric Kettle

This electric kettle features a vibrant red translucent body, allowing visibility of the water level as it heats. It is equipped with a stainless steel base for durability and an automatic shut-off function for safety.

Product Overview

Vibrant and Efficient Boiling

This electric kettle features a distinct red translucent design, offering a stylish aesthetic while allowing for instant visibility of water levels during heating. Designed for daily convenience, it combines a durable stainless steel base with an efficient internal heating element for rapid boiling performance. Safety is prioritized through an integrated automatic shut-off function, making it an ideal choice for offices, breakrooms, or catering environments.
