

Refillable Fluid Lighter with Lever Ignition

This lighter is designed with a metallic top and a lever mechanism for easy ignition. The transparent body allows users to easily monitor the fluid level.

Product Overview

Professional Fluid Lighter

This refillable fluid lighter features a robust lever ignition mechanism designed for reliable performance. The transparent body construction allows users to monitor fluid levels at a glance, ensuring continuous operation in busy environments. It is a versatile tool suitable for integration into printing machinery setups or for general-purpose lighting tasks.

Design and Build

Ignition Type	Lever Ignition
Refillable	Yes
Body Transparency	Transparent for fluid monitoring
