Product Overview

Professional Reflective Safety Rope

This high-visibility safety rope is engineered for durability and reliability in demanding outdoor environments. It features integrated reflective strands to ensure maximum visibility in low-light and nighttime conditions. Built with advanced material properties, it provides robust resistance against wear, corrosion, and chemical exposure.

Material Properties

Chemical & Environmental Resistance

Wear Resistant, Corrosion Resistant, Acid Resistant, Alkali Resistant

Safety & Usage

Safety Guidelines

- Do not use for aerial lifting
- Do not exceed established workload capacity
- Impact loads reduce workload capacity by 33%
- Knotting the rope reduces overall strength by 40%
- Replace immediately if fibers show signs of wear

Usage Environment

Recommended Applications

Outdoor Activity • Emergency Situations • Low-Light Conditions • Professional Duty
