

# Refracting Telescope with Equatorial Mount

This refracting telescope is designed for astronomical observations. It features an equatorial mount, optical tube, finder scope, and adjustable tripod for both terrestrial and celestial viewing.

## Product Overview

### Professional Refracting Telescope

This refracting telescope is designed for versatile astronomical and terrestrial observation. It features a stable equatorial mount, making it ideal for tracking celestial bodies across the night sky. The package includes a high-quality optical tube, a finder scope for easy alignment, and an adjustable tripod for customized viewing heights.

## Technical Specifications

Mount Type	Equatorial
Viewing Capabilities	Astronomical, Terrestrial

## Key Features

### Package Inclusions

- Optical Tube Assembly
- Finder Scope
- Adjustable Tripod
- Equatorial Mount

### Design Finish

White Optical Tube
