

# Refrigerant Can Tap with 1/4" SAE Connection

This refrigerant can tap connects to 1/4" SAE fittings. It is designed for accessing refrigerant cans in HVAC&R systems.

## Overview

### Professional Refrigerant Can Tap

This refrigerant can tap is designed for reliable use in HVAC&R systems, providing a secure and controlled method for accessing refrigerant cans. Built with durable metal, it features a hand-operated valve and a built-in piercing mechanism to ensure efficient and safe operation. It is fully compatible with both R12 and R134a refrigerants, making it a versatile tool for technicians.

## Technical Specifications

Compatible Refrigerants	R12, R134a
Connection Thread	1/4" SAE

## Design Features

### Operation

- Hand-operated valve
- Integrated piercing mechanism
- Blue control knob
- Green side port cover

Construction	Durable metal construction
