

Refrigerant Flush Gun Kit

This kit quickly and efficiently removes old refrigerant oil and debris. It is used before replacing or retrofitting a compressor system.

Product Overview

Professional Refrigerant Flush Gun Kit

This comprehensive flush gun kit is designed to effectively remove contaminants, moisture, and acid from refrigeration and air conditioning systems. It features a durable aluminum alloy and brass construction with a 900ml internal volume capacity. Equipped with a pressure gauge and versatile hose connections, this tool is essential for maintaining system performance and longevity.
