

# Refrigerant Recovery Machine with 2 Ports

This machine provides fast recovery of Class 3, 4, and 5 refrigerants, including R410A. It is designed for convenient portability.

## Overview

### Professional Refrigerant Recovery Solution

This high-performance refrigerant recovery machine is designed for efficiency and ease of use in professional HVAC service environments. Featuring an oil-less, maintenance-free piston compressor, it offers robust recovery rates for vapor and liquid. With its specialized subcooling capabilities, it ensures optimal performance even in hot weather conditions by effectively managing tank pressure.

## Technical Specifications

### Operating Environment

Parameter	Value
Operating Temperature	0~49°C (32~120°F)
Rotation Speed	3500 RPM

Power Supply 110/220V, 50~60Hz

Compressor Type 1/2HP, Oil-less, Piston type

## Performance Metrics

### Recovery Rates

**250 kg/h**

Push-pull Rate

**28 kg/h**

Vapour Rate

**90 kg/h**

Liquid Rate

## Features

### Available Options

Two-color selection available
