

Refrigerant Recovery Plier for Air Conditioning Systems

This plier facilitates the recovery of refrigerant from refrigeration tubes. It is designed for use in air conditioning and refrigeration systems.

Overview

Efficient Refrigerant Recovery

This specialized refrigerant recovery plier is engineered for air conditioning and refrigeration systems, streamlining the recovery process for HVAC&R technicians. The tool features a unique snap-on design that punctures a large hole in the refrigerant line, ensuring immediate and maximum full flow to the recovery unit. With an adjustable mechanism, it accommodates a wide range of hard tubing sizes, making it a versatile and essential addition to any maintenance or decommissioning toolkit.

Technical Specifications

Compatible Tubing Sizes

- 3/16 inch
- 7/8 inch

Needle Material	Replaceable hardened steel
Key Features	Adjustable, Full Flow Design, Snap-on Mechanism, Replaceable Needle
