

Refrigerated Enclosed Waste Transfer Vehicle

This closed transfer vehicle is designed for efficient and hygienic waste management. Its fully enclosed cargo area prevents spills and odors, ensuring a clean and safe environment.

Overview

Efficient Waste Management Solution

This refrigerated enclosed waste transfer vehicle is engineered for hygienic and efficient waste management in professional settings. Featuring a fully enclosed cargo area, it effectively contains odors and prevents spills during transport. The roof-mounted refrigeration unit makes it an ideal choice for handling temperature-sensitive waste or perishable goods, while its compact design ensures excellent maneuverability in tight urban environments.

Design & Build

Power Type

Electric

Cargo Enclosure

Fully enclosed

Cooling System

Roof-mounted refrigeration unit

Operational Features

Operational Benefits

- Odor containment
- Spill prevention
- Temperature-controlled transport
- Urban maneuverability

Operator Visibility

Large windshield for optimal view
