

# Refrigerated Transport Truck

This refrigerated truck is a specialized vehicle for transporting temperature-sensitive goods. The insulated cargo area maintains a consistent temperature, ensuring the integrity of perishable items during transit.

## ADDITIONAL IMAGES

## Overview

### Professional Refrigerated Transport Solution

The SC5035XLCDCGB5 is a specialized refrigerated transport truck engineered for the reliable delivery of temperature-sensitive goods such as food and pharmaceuticals. It features a high-performance 82kW engine and a spacious 8-cubic-meter cargo area with advanced 80mm thick insulation. Designed for efficiency and durability, this vehicle includes a double-fan cooling system and independent dual-compressor architecture to ensure precise, consistent temperature control during transit.

## Performance

### Engine Performance

**1499 ml**  
Displacement

**82 kW**  
Power

### Emission Standard

Euro V

## Cargo & Chassis

### Chassis Features

- Rear twin tires for enhanced stability
- Anti-skid and wear-resistant aluminum floor
- Stainless steel waterproof drainage platform

Rated Load Mass	1415 kg
Cargo Space Volume	8 m <sup>3</sup>
Insulation Layer Thickness	80 mm

## Refrigeration System

### Cooling System Design

- Double-fan structure for high airflow
- Independent dual-compressor architecture
- Separated front and rear air conditioning systems
