Product Overview

Professional Cooling Solution

The GQR16U compressor is an efficient, hermetic solution specifically engineered for compact refrigeration needs including water dispensers, mini-drink cabinets, and beer coolers. Operating on R290 refrigerant, this unit provides a reliable 3/4HP performance with a cooling capacity of 740W. Its robust design is built for demanding L/MBP applications, ensuring consistent temperature control in residential or commercial settings.

Technical Specifications

Refrigerant

R290

Model Number

GQR16U

Motor Type

CSR

Cooling Method

F

Starting Device

Current Relay

Electrical Requirements

Voltage Range

220V - 240V

Frequency

50/60 Hz

Performance Metrics

Key Performance Data

0.75 HP

Nominal Power

740 W

Cooling Capacity

1.3
