

Refrigerator Motor

This compact and robust motor is designed for refrigerator and refrigeration equipment applications. It operates at 127V and 50/60Hz and features a durable construction and a shaft for mechanical integration.

Product Overview

Reliable Refrigeration Motor

This compact and robust motor is specifically engineered for refrigerator and refrigeration equipment applications. Designed for durability and seamless mechanical integration, it ensures consistent performance in various cooling systems. With a power output of 10W and support for dual-frequency operation, it is a dependable component for professional refrigeration maintenance and assembly.

Technical Specifications

Model Number	J58-00024K
Power Output	10 W
Rated Voltage	127 V
Operating Frequency	50Hz, 60Hz

Performance Metrics

Performance Highlights

10 W Power	127 V Voltage
