Overview

Professional Waste Collection Solution

This refuse collection vehicle is engineered for efficient municipal waste management and urban sanitation services. Featuring a robust chassis and a hydraulic lifting system, it ensures reliable loading and unloading of waste materials. The versatile design supports a wide range of operational requirements, making it an ideal choice for city waste collection and disposal services.

Technical Specifications

Loading Capacity Range

1 T

Minimum Capacity

8 T

Maximum Capacity

Gross Vehicle Weight

8275 kg

Engine Type

Diesel

Features

Key Operational Features

- Hydraulic lifting system for automated waste handling
- Robust chassis construction for durability
- High-capacity compactor body
- Safety reflectors and standard industrial tires
