

Reinforced Abrasive Cut-Off Wheel for Steel

This reinforced abrasive cut-off wheel is designed for cutting steel and stainless steel. It is compliant with EN 12413 safety standards.

Product Overview

Professional Grade Cut-Off Wheel

This reinforced abrasive cut-off wheel is engineered specifically for efficient and safe cutting of steel and stainless steel materials. Designed with a Type 42 depressed center profile, it offers high durability and stability during heavy-duty operations. Compliant with international safety standards, this disc is a reliable choice for industrial metalworking applications requiring precision and consistency.

Technical Specifications

Dimensions

230 mm
Diameter

3 mm
Thickness

22.2 mm
Bore Size

Operating Limits

6600 RPM
Max RPM

80 m/s
Operating Speed

Abrasive Grade	A30R-BF
Wheel Type	Type 42 (Depressed Center)

Compliance & Quality

Material Suitability
Steel • Stainless Steel

Certifications	EN 12413, ISO 9002
Manufacturing Origin	China
