

Remote Control Switch for Industrial Machinery

This handheld remote switch is designed for controlling machinery. It allows for safe and convenient operation of equipment from a distance.

Overview

Industrial Remote Control Solution

This handheld remote switch is engineered for the reliable control of industrial machinery, such as hoists and winches. Featuring a durable, ergonomic black plastic housing, it ensures comfortable and safe operation from a distance. The unit is equipped with a multi-pin connector, making it compatible with standard industrial equipment setups.

Technical Details

Housing Material	Durable industrial-grade plastic
Connection Interface	Multi-pin industrial connector
Design Features	Handheld, Ergonomic Grip, Industrial Grade

Applications

Typical Applications

- Hoist Control
- Winch Operation
- Industrial Machinery Remote Control
