

Remote Controlled Pedestal Fan with Timer

This electric fan has a remote control and adjustable height. It also features a 7.5-hour timer and overheat protection for the motor.

Overview

High-Performance Pedestal Fan

This professional-grade pedestal fan is designed for high-volume air circulation in workspace environments. It features a robust 18-layer pure copper motor for reliability and longevity, complemented by advanced safety features including motor overheat protection. With user-friendly controls like an infrared remote and a 7.5-hour programmable timer, it offers flexible climate control for various professional settings.

Key Features

Core Functionalities

- Full-function infrared remote control
- Adjustable height settings
- 7.5-hour automatic timer
- High-volume air output design

Technical Specifications

Color/Finish

Black and Silver

Motor Construction

18-layer pure copper motor

Safety Standards

Motor Overheat Protection, High-Quality Power Cord

Model Identifier

FS40-1
