

Remote Radio Unit for Cellular Base Stations

This remote radio unit is designed for cellular base stations. It provides reliable wireless communication infrastructure and is suitable for outdoor deployment.

Product Overview

High-Performance Remote Radio Unit

This remote radio unit is engineered specifically for cellular base station deployment, ensuring robust wireless communication infrastructure. Its compact form factor is paired with advanced thermal management, making it an ideal choice for challenging outdoor environments. Designed for reliability, the unit supports consistent performance in critical telecommunications networks.

Technical Details

Model Number	CRRU01-1311C
Deployment	Cellular Base Station, Outdoor, Wireless Infrastructure

Performance Features

Thermal Control
Robust Thermal Design
