Product Overview

High-Performance Suspension Solution

This remote reservoir shock absorber is engineered to deliver superior vehicle stability and control in demanding environments. Featuring an advanced cooling design and adjustable damping, it provides a tailored ride experience for off-road and performance applications. Its robust construction ensures longevity and consistent performance under extreme conditions.

Technical Specifications

Piston Diameter	2 inch
Cooling System	Remote Reservoir
Key Features	Adjustable Damping, Enhanced Stability, Remote Reservoir, Durable Construction

Design and Compatibility

Design Details

- Black cylinder body
- Red aesthetic accents
- Robust piston rod
- Flexible remote connection hose

Series

MuscleLift
