

Repurposed Beer Cap Earphones

These earphones feature repurposed beer caps as the earpiece housing. The earphones have a green cable and display the brand's logo.

Product Overview

Innovative Audio Design

These unique earphones feature an eco-friendly design, utilizing repurposed bottle caps as the primary housing for the earpieces. This creative approach combines functional audio performance with a distinct, upcycled aesthetic. The design includes a durable cable and is built for users seeking a conversation-starting accessory that repurposes existing materials.
