

# Residential Air Source Heat Pump

This air source heat pump is designed for residential heating applications. It features a Copeland compressor and provides hot water supply up to 400L/H.

## ADDITIONAL IMAGES

## Product Overview

### High-Efficiency Residential Heating

This residential air source heat pump offers a sustainable and energy-efficient solution for your heating needs. By utilizing heat energy from the ground and advanced compressor technology, it reduces energy consumption by over 75% compared to traditional heaters. Designed with environmental responsibility in mind, the system operates with zero waste and significantly contributes to reducing CO2 emissions.

## Technical Specifications

Water Pressure	0.6 MPa - 0.9 MPa
Control System	LCD touch screen controller with automatic start/stop functionality
Compressor	High-performance compressor

## Efficiency & Performance

### Energy Savings

**75 %**

Energy Consumption Reduction

Environmental Profile	Low Carbon, Zero Waste, No Pollution, Low Exhaust
-----------------------	---

## Trade Terms

### Payment Terms

- 30% deposit to start production
- 70% balance before shipping

<b>Minimum Order Quantity</b>	3
<b>Warranty</b>	14 months from delivery
<b>Delivery Time</b>	Within 15 days after deposit
<b>Packaging</b>	Standard Export Packing (Plywooden crate with plastic bag inside)
