

Residential Gas Water Heater

This gas water heater provides on-demand hot water for residential use, eliminating the need for a storage tank. The unit features a digital display for easy temperature control and monitoring.

Product Overview

High-Efficiency Residential Solution

This advanced gas water heater utilizes fully premixed and inverted combustion technology to deliver exceptional performance. Engineered for reliability, it features a durable stainless steel heat exchanger and a high-efficiency condensation system. With low NOX emissions and a quiet, efficient BLDC motor fan, it provides a sustainable and comfortable hot water solution for residential applications.

Performance Metrics

Thermal Efficiency

108 %
Efficiency

NOX Emission

20 ppm
Max Emission

Technical Specifications

Model Number	JSG53-32PCH
Dimensions (H x W x D)	620 x 440 x 250 mm

Compliance & Safety

Certifications	CSA Certified

Key Features

Core Technologies

- Fully premixed combustion
- Inverted combustion technology
- Condensation technology
- Stainless steel heat exchanger
- BLDC motor fan exhaust

Fan System Benefits

High Efficiency • High Reliability • Low Noise • Longer Life
