Product Overview

High-Efficiency Residential Heating

This residential gas water heater is engineered for reliable, on-demand hot water delivery. Featuring intelligent constant temperature control and advanced energy-saving combustion technology, it ensures optimal performance while minimizing fuel consumption. Designed with multiple safety mechanisms and an oxygen-free heat exchanger, this unit provides a durable and secure solution for modern home water heating needs.

Performance Metrics

Heat Efficiency

88 %

Thermal Efficiency

Start-up Requirement

Low water pressure start-up

Features & Technology

Key Features

- Intelligent constant temperature control
- Energy-saving combustion technology
- Oxygen-free heat exchanger
- LED display interface
- Remote control included

Safety & Protection

Safety Systems

Over-heating protection, Flameout protection, Anti-freezing protection (Optional)

Installation

Installation Environment

Outdoor use design
