

Residential Lawn Mower Engine

This compact and lightweight engine is designed for residential lawn mowers. Featuring a durable overhead valve (OHV) design, it delivers reliable performance and fuel efficiency.

Product Overview

500e Series Residential Mower Engine

The 500e Series engine is engineered to provide an optimized mowing experience specifically for entry-level residential lawn mowers. It features a best-in-class torque-to-weight ratio combined with reduced vibration and improved noise dampening. Designed for reliability and user convenience, this engine ensures hassle-free operation for small to medium-sized lawn maintenance.

Performance Features

Starting Mechanism	Easy Pull Start, Ready Start System
Muffler Technology	Super Lo-Tone Muffler

Technical Specifications

Key Benefits

- Compact and lightweight design
- Improved fuel efficiency
- Reduced noise levels
- Low vibration operation

Valve Configuration	Overhead Valve (OHV)
Lubrication Type	Splash Lubrication
