

Residential Single-Stage Snowplow

This single-stage snowplow is designed for residential snow removal. It features a powerful engine and rotating auger for efficient snow clearing.

Product Overview

Designed for Residential Efficiency

This single-stage residential snowplow is engineered to streamline snow removal for homeowners. Equipped with a robust gasoline-powered engine and a specialized rotating auger, it effectively breaks up and displaces snow from driveways and walkways. Its compact, maneuverable frame ensures ease of use and convenient storage, while integrated safety mechanisms prioritize operator protection.

Technical Specifications

Engine Type	Gasoline
Clearing System	Rotating auger
Key Features	Compact design, Adjustable handles, High-traction tires

Safety & Compliance

Safety Equipment

- Emergency shut-off switch
- Protective auger housing
