

Residential Tankless Water Heater

This is a tankless water heater designed for residential use. It features a digital display and control knobs.

Product Overview

High-Efficiency Residential Solution

This advanced residential tankless water heater is engineered to provide rapid heating through its dual-chamber technology. It prioritizes user safety by incorporating multiple protective systems, including measures against dry-firing, overheating, and overpressure. Designed specifically for domestic household use, this unit combines modern digital controls with rigorous safety compliance to ensure a reliable and consistent hot water supply.

Safety & Compliance
