

Residential Wall-Mounted Split Air Conditioner with Sterilization

This wall-mounted split air conditioner is designed for residential use. It features advanced sterilization technology for improved air quality and energy-efficient operation.

Product Overview

Advanced Residential Air Comfort

This wall-mounted split air conditioner is engineered to provide superior indoor air quality and precise climate control for residential spaces. It features advanced sterilization technologies, including UVC and high-temperature cleaning, ensuring a healthier living environment. With intelligent sensors and dual-drive air supply, the unit offers a quiet, comfortable, and energy-efficient cooling solution.

Air Quality & Sterilization

Sterilization Methods	UVC Safe Sterilization, 56 High-Temperature Sterilization
Ventilation	Two-way fresh air ventilation

Performance & Design

Air Supply System

- Concealed dual air guide louvers
- Dual-drive mixed air supply

Smart Features

Intelligent photosensitive sensor • Sleep optimization
