Product Overview

Smart Residential Softening

The Q Series Residential Water Softening System is a compact and efficient solution designed to remove hardness minerals like calcium and magnesium from household water. Utilizing an advanced ion exchange process, it effectively prevents scale buildup and improves the efficiency of your water-using appliances. This system combines durable construction with intelligent features like WIFI connectivity and real-time leakage protection to ensure reliable, high-quality water for your home.

Interface & Control

Control Features

- 3.5-inch LCD display screen
- Touch-sensitive control buttons
- WIFI remote controlling capabilities
- Intelligent leakage protection

Technical Compatibility

Safety Features

Real-time leakage protection • Intelligent monitoring

Compatible Tank Sizes

1024, 1035
