

Residual Current Circuit Breaker

Residual current circuit breakers (RCCB) protect against electrical shock and fire hazards. The devices disconnect the circuit when a leakage current is detected, preventing injury and damage.

Product Overview

Residual Current Circuit Breaker (RCCB)

This Residual Current Circuit Breaker is engineered to provide essential protection against electrical shock and potential fire hazards. By swiftly disconnecting the circuit upon detecting leakage current to earth, it effectively safeguards both personnel and property. Designed for versatility, this device is suitable for a wide range of applications including residential, commercial, and industrial electrical systems.

Technical Specifications

Suitable Environments

- Residential
- Commercial
- Industrial

Safety Compliance

Safety Standard Compliant

Protection Type

Leakage Current Protection, Electrical Shock Prevention, Fire Hazard Protection
