

Residual Current Circuit Breaker

This residual current circuit breaker is designed for electrical safety. It complies with IEC61008-1 standards and features a 'Push monthly' test function and ON/OFF indicator.

Product Overview

Professional Electrical Safety

This Residual Current Circuit Breaker (RCCB) is engineered to provide reliable protection against earth faults and leakage currents. Designed for industrial and commercial environments, it features robust fire-resistant materials capable of withstanding abnormal heating and mechanical impact. The device operates independently of line voltage and external interference, ensuring consistent safety performance for your electrical infrastructure.

Key Features

Operational Features

- Automatic disconnection on earth fault detection
- Independent of power supply and line voltage
- Integrated 'Push monthly' test functionality
- Visual ON/OFF position indication
- High breaking current withstand capacity

Technical Specifications

Available Configurations

Poles	Rated Current (A)	Rated Voltage (V)	Sensitivity (mA)
2P	63	240	100
4P	40	415	100

Certifications IEC 61008-1

Frequency 50 Hz
