

Resin Fiber Grinding Wheel for Cutting

This is a fiber reinforced resin grinding wheel designed for cutting. It is engineered for efficient material removal and clean cuts.

Product Overview

High-Performance Cutting Solution

This resin fiber grinding wheel is specifically engineered for precision cutting applications. Designed for durability, it facilitates efficient material removal while maintaining clean, accurate cuts. The wheel is compatible with standard electric power tools, offering smooth operation and consistent performance for professional industrial tasks.

Technical Details

Maximum Speed

3800 RPM

Max Operating Speed

Composition	Resin Bonded, Fiber Reinforced
Primary Application	Material Cutting

Product Features

Key Attributes

- High durability for extended use
- Engineered for clean and precise cuts
- Optimized for electric tool compatibility
- Fiber reinforcement for structural integrity
