

Resin Triangle Abrasive Disc for Grinding and Polishing

This resin disc is designed for grinding, polishing, and surface preparation. It features multiple embedded resin triangle abrasive segments and a durable backing for extended tool life.

Product Overview

Professional Grinding and Polishing Performance

This resin triangle abrasive disc is engineered for high-performance grinding and surface preparation applications. Featuring multiple embedded resin triangle segments, it offers exceptional consistency and extended tool life for demanding industrial environments. It is a versatile tool designed to deliver superior finishing results on diverse materials including concrete and stone.

Performance Metrics

Applications

Concrete Grinding, Stone Polishing, Surface Preparation

Construction

Key Features

- Durable backing material
- High-quality resin matrix
- Triangle segment configuration

Abrasive Design

Embedded resin triangle segments
