

Resin Water Filter

This resin filter is designed for use in water dispensers and other household appliances. It effectively removes minerals and impurities from water, providing cleaner and better-tasting water.

Product Overview

High-Efficiency Resin Water Filtration

The FU16-FT16 resin filter is engineered for optimal performance in water dispensers and various household appliances. It specializes in the effective removal of minerals and impurities, ensuring cleaner, better-tasting water for your daily needs. With its durable construction and straightforward installation process, this filter provides a reliable and convenient solution for maintaining superior water quality.

Technical Specifications

Model Number	FU16-FT16
Filtration Media	Resin
Primary Applications	Water Dispensers, Household Appliances

Key Features

Benefits

- Effective mineral removal
- Impurity reduction
- Improved water taste
- Durable construction
- Easy installation
