

Retail POS Terminal with Integrated Receipt Printer

This electronic cash register and POS terminal is designed for retail and business use. It features a keypad, barcode scanner, display screen, and built-in printer, supporting various payment methods and offering sales tracking and inventory management.

Product Overview

Professional Retail POS Solution

This versatile POS terminal is engineered for efficient transaction processing in retail and business environments. It combines essential checkout functions, including manual keypad entry and barcode scanning, into a single, compact, and durable countertop unit. With an integrated receipt printer and comprehensive sales reporting capabilities, it provides an all-in-one system for managing transactions and inventory.
