

Retractable Power Cable Reel

Retractable cable reel designed for power distribution in workshops and industrial settings. It features a durable housing, automatic rewind mechanism, and a locking system to maintain desired cable length.

Overview

Professional Retractable Power Solution

This industrial-grade retractable power cable reel is designed to enhance efficiency and safety in demanding environments like assembly workshops and automotive service centers. Featuring an automatic rewind mechanism with a hose guide system, it ensures neat cable management and prevents hazardous tangles. The durable PP casing and high-quality H07RN-F cable provide a reliable power source for professional tools and equipment.

Performance

Power Capacity

1500 W

Min Power

3500 W

Max Power

Technical Specifications

Voltage	230 V
Cable Material	H07RN-F3G2.5MM2
Casing Material	Polypropylene (PP)

Configurations

Cable Length Options

Main Cable	Lead-in Cable
15m	1m
20m	1.5m
24m	2m

Compatibility

Available Plug & Socket Types	UK, GERMANY, SOUTH AFRICA, AUSTRALIA
-------------------------------	--------------------------------------

Features

Operational Features

- Auto lock and auto stop mechanism
- Hose guide system for neat retraction
- Integrated safety lock
- 2 years anti-UV protection

Applications

Ideal Environments

- Production assembly workshops
- Maintenance workshops
- Automobile beauty shops
- Automobile 4S shops

Compliance

Certifications

CE • ROHS
