

Reusable Full Body Isolation Gown

This full-body isolation gown is designed for use in non-isolated zones. It is reusable up to 100 times after high-temperature disinfection.

Product Overview

Professional Protective Isolation Gown

This full-body isolation gown is engineered for use in non-isolated zones, offering a sustainable alternative to single-use garments. Constructed from durable, fluid-resistant materials, it provides a reliable barrier against liquids and particles in medical and laboratory environments. The design features a protective hood and a full-length zipper, ensuring complete coverage and ease of use for healthcare professionals.
