

Reusable Isolation Gown for Medical Use

This isolation gown is reusable after high temperature disinfection. The models are suitable for use in Non-Red Zone environments.

Product Overview

Reusable Medical Protection

This reusable isolation gown provides a reliable protective barrier for medical environments outside of high-risk red zones. Constructed for durability, it maintains integrity through up to 100 cycles of high-temperature disinfection. It offers a cost-effective and environmentally sustainable alternative to single-use disposable gowns.

Technical Specifications

Usage Environment	Non-Red Zone, Medical Use
Max Disinfection Cycles	100 cycles

Design Features

Key Design Elements

- Long sleeves with elastic cuffs
- Full back coverage
- Tie closures for secure fit
- Fluid-resistant construction
