

Reverse Discharge Concrete Mixer

This reverse discharge concrete mixer is designed for efficient and reliable mixing of concrete. Its portable design allows for easy transportation and setup on various construction sites.

Product Overview

Professional Reverse Discharge Concrete Mixer

This reverse discharge cone concrete mixer is engineered for high-efficiency mixing and reliable performance on construction sites. The unit features a specialized cone-shaped drum that ensures consistent, high-quality concrete output for small to medium-sized projects. Its durable drive system and robust construction provide long-lasting reliability, while the reverse discharge mechanism simplifies the unloading process.

Technical Specifications

Equipment Features

- Powerful motor
- Durable drive system
- Reverse discharge mechanism
- Cone-shaped drum
- Portable design

Mixer Design	Reverse discharge cone
Mobility	Yes
Ideal Project Scale	Small projects, Medium-sized projects
