

Reverse Discharge Concrete Mixer

This concrete mixer features a rotating drum with internal blades for uniform mixing. Its reverse discharge mechanism allows for easy material unloading.

Product Overview

Professional Concrete Mixing Solution

This robust reverse discharge cone concrete mixer is engineered for the efficient and thorough preparation of concrete, mortar, and various construction materials. It features an advanced rotating drum with integrated internal blades to guarantee uniform consistency throughout every batch. With its dedicated reverse discharge mechanism and high-mobility wheeled chassis, this unit is designed to maximize productivity and ease of use on small to medium-sized construction projects.

Technical Specifications

Mixer Design	Reverse discharge cone mixer
Mixing Method	Rotating drum with internal blades

Key Features

Recommended Use

- Construction sites
- Small to medium-sized projects
- DIY applications

Mobility & Handling	Wheeled chassis, On-site maneuverability, Easy unloading
