

Reverse Discharge Concrete Mixer

This concrete mixer features a rotating drum with a conical shape for thorough mixing and easy discharge. The mixer is mounted on a wheeled chassis for portability and includes a loading hopper for convenient material input.

Product Overview

Robust Concrete Mixing Solution

The Reverse Discharge Concrete Mixer is a high-performance machine engineered for consistent and thorough concrete preparation. Featuring a unique conical drum design, it facilitates efficient mixing cycles and rapid, controlled material discharge. This unit is built for versatility, incorporating a loading hopper for easy material input and a mobile wheeled chassis for seamless relocation across diverse job sites.

Technical Specifications

Discharge Mechanism	Reverse Discharge
Drum Shape	Conical
Power Source	Electric Motor

Features

Material Handling Loading Hopper Included	
Mobility	Wheeled Chassis, Portable, Construction Site Ready
