Overview

Advanced Water Purification & Kettle

This innovative water purifier combines an advanced 4-stage reverse osmosis filtration system with an integrated kettle for maximum convenience. Designed for zero-installation, it provides purified water on demand with smart control settings for temperature and volume. Its food-grade borosilicate glass design ensures safe, clean drinking water for kitchens, offices, or bedrooms.

Performance & Capacity

Key Performance Metrics

0.47 L/min

Flow Rate

1500 ml

Glass Jar Capacity

2000 ml

Pure Water Capacity

Technical Specifications

Technical Parameters

Feature	Specification
Model	KFL-LP-180A
Inlet Pressure	0-0.2MPa
Power Supply	220V
Installation	Zero Installation
Electrical Standard	Class I

Key Features

Key Highlights

- 4-stage purification guard with 2 RO filters
- Zero waste, zero reject water system
- Auto-flush and self-cleaning filter technology
- One-hand, one-second quick-connect DIY filter replacement
- Smart temperature and volume control

Materials & Safety

Safety Features

Food Grade Borosilicate Glass, Zero Pollution, Leakage Prevention, Smart Control
