

Reversible Plate Compactor

This plate compactor is designed for efficient soil compaction on construction sites. Its reversible mechanism allows for forward and backward movement, improving maneuverability in confined spaces.

Overview

Professional Soil Compaction Performance

The CPC-240-H reversible plate compactor is a heavy-duty machine engineered for demanding construction and industrial soil consolidation. Featuring a high-performance 9.0 HP Honda engine, this unit delivers consistent power to achieve a 50cm compaction depth. Its reversible operation significantly enhances maneuverability, making it an ideal solution for backfilling trenches, preparing roadbeds, and foundation work in confined job site conditions.

Technical Specifications

Power Output

5.8 kW

Power Output

9 hp

Horsepower

Compaction Performance

Metric	Value
Centrifugal Force	35 kN
Compaction Depth	50 cm
Vibration Frequency	5200 vpm
Efficiency	570 m ² /hr

Physical Characteristics

- Weight: 240 kg
- Plate Size: 700 x 450 mm
- Overall Dimensions: 1340 x 450 x 960 mm

Engine Details

Engine Specification

Air-cooled, 4-cycle, Single cylinder, Honda GX270, Petrol

Operational Features

Travel Speed

40 cm/s
