It is strict for every detail.  
IP67

Engineered for durability with an IP67 rating, ensuring reliable operation in harsh environments.

## RFID Patrol Management System

This RFID patrol management system is engineered for durability and reliability in demanding security environments. Featuring a ruggedized, waterproof, and dustproof design with an IP67 rating, it ensures consistent performance for tracking security personnel routes. The system utilizes a specialized pogo pin connector for improved longevity compared to standard USB ports, providing a cost-effective and highly dependable solution for guard tour management.

## Technical Specifications

### Longer Battery Life

500 readings per day, it can work at least 60 days.

3.7V/ 880mAh

Battery Capacity : 3.7V/ 880mAh

1150mAh

Designed for efficiency, offering long battery life capable of supporting 500 readings per day for up to 60 days.

### Ingress Protection

IP67 • Waterproof • Dustproof • Shatter-resistant • Vandal-resistant

### Battery Capacity

1150 mAh

### Battery Performance

Up to 60 days with 500 readings per day

### Charging Time

2 hours

### Data Interface

Drive-free magnetic USB with pogo pin connector

## Key Features

### Colorful LED Light

    
Charging Reading Full Charge

Visual status communication using colorful LED indicators for charging, reading, and battery status.

### Status Indicators

- Colorful LED light (Charging/Reading/Full Charge)
- Vibration prompts
- Reading confirmation
- Low battery alert
