

RG11 Coaxial Cable

This RG11 coaxial cable features a copper conductor and braided shield. It is designed for high-performance signal transmission in applications like cable television, satellite, and broadband internet, and provides shielding against electromagnetic interference.

Product Overview

High-Performance RG11 Coaxial Cable

This RG11 coaxial cable is engineered for reliable signal transmission in demanding environments, including cable television, satellite, and broadband internet systems. Featuring a robust 1.63mm CCS inner conductor and multi-layer shielding, it provides excellent protection against electromagnetic and radio frequency interference. Designed for versatility, this cable is suitable for both indoor and outdoor installations, ensuring a clean and consistent signal path.

Technical Specifications

Characteristic Impedance

75 ohm

Impedance

Inner Conductor Diameter	1.63 mm
Inner Conductor Material	CCS (Copper Clad Steel)
Dielectric Diameter	7.2 mm
Dielectric Material	Foam PE

Shielding & Construction

Foil Shield	AL/PES/AL foil
Braiding Configuration	96 x 0.16 Aluminum
Outer Jacket Diameter	10.3 mm
Outer Jacket Material	PVC

Logistics & Customization

Packing Options	100m Roll, 1000m Roll, Wooden Spool
Customization	Yes
