Overview

Professional RG6 Coaxial Cable

This high-quality RG6 coaxial cable is engineered for reliable signal transmission in demanding residential and commercial environments. It features a robust construction including a 1.02mm conductor and high-grade FPE dielectric to ensure optimal signal clarity. Designed to meet international standards, it offers versatile shielding and jacket options to suit diverse installation requirements.

General Information

Certifications	CE, RoHS
Cable Type	Coaxial
Number of Conductors	1

Construction

Conductor Material

- Bare Copper
- Copper Clad Steel (CCS)

Outer Jacket Material

- PVC
- PE

Inner Conductor Diameter	1.02 mm
Dielectric	4.57 - 4.80mm FPE
Jacket Diameter	6.80 - 7.00mm

Performance Options

Jacket Colors

White • Black • Yellow • Customized

Compatible Connectors

F-connector, BNC
