Product Overview

High-Performance RG6 Coaxial Cable

This premium RG6 coaxial cable is engineered for reliable, high-frequency signal transmission in professional telecommunications environments. Designed to minimize interference and signal loss, it is ideal for cable television, satellite systems, and high-speed broadband applications. The cable features a durable outer jacket and robust multi-layered shielding to ensure long-term performance and signal integrity.

Technical Specifications

Physical Construction

Component	Specification
Inner Conductor	1.02 Bare Copper / CCS
Dielectric	4.57 - 4.80mm FPE
Outer Conductor	Al Foil + 70%, 90%, 95% Braid
Braid Material	Al-Mg, CCA, BC, TC
Outer Jacket	6.80 - 7.0mm PVC/PE

Compliance and Usage

Available Colors

- White
- Black
- Customized

Supported Connectors

F-connector • BNC

Industry Standards

CE, RoHS
