

# RGB Color Changing LED Wall Washer

This LED wall washer is designed for stage and architectural lighting projects. It features waterproof construction and RGB color changing capabilities.

## ADDITIONAL IMAGES

## Product Overview

### Professional Grade RGB Wall Washer

This high-intensity LED wall washer is engineered for dynamic architectural and stage lighting applications. Designed with advanced thermal management, including intelligent temperature control and convection cooling, it ensures long-term stability and consistent performance. The fixture features a waterproof design and vibrant RGB color-changing capabilities, making it an ideal solution for lighting building facades, bridges, and entertainment venues.

## Key Features

### Product Highlights

- Low power consumption with high intensity output
- Advanced thermal management with intelligent overheating power reduction
- Robust waterproof construction for exterior durability
- Eco-friendly: No UV radiation and no mercury emission
- Adjustable fan speed for noise reduction and cooling

## Performance Metrics

### Operating Characteristics

**1 Integrated**

Thermal Control
