

RGB Computer Cooling Fan

This high-performance computer cooling fan efficiently dissipates heat. Integrated RGB lighting offers customizable aesthetics.

Overview

High-Performance Air Cooling Solution

This 120mm RGB cooling fan is engineered to deliver efficient thermal management for critical computer components. Featuring aerodynamically optimized blades, it maximizes airflow while minimizing turbulence for a quieter computing experience. The integrated vibration-dampening pads and customizable RGB lighting offer a perfect balance of performance and aesthetics for any system build.

Physical Specifications

Form Factor	120mm
Construction	Durable Frame, Vibration-Dampening Pads

Technical Features

Lighting

Integrated RGB

System Compatibility

- Standard motherboard fan headers
- Software-controlled speed
- Software-controlled lighting
