

RGB Interface Cable

This RGB interface cable connects computer monitors and other devices with RGB video inputs. It is designed for reliable signal transmission and high-quality video output.

Product Overview

Professional RGB Interface Solution

This standard RGB interface cable is engineered for reliable signal transmission between computer systems and display devices. Designed with a robust D-sub connection interface, it ensures high-quality video output for demanding professional applications. The cable features a durable gray construction, making it a dependable choice for long-term use in various computing environments.

Technical Details

Color	Gray
Connector Type	D-sub
Application	Computer Monitor, Video Input, RGB Display
